Built a developer-focused social platform enabling users to connect, collaborate on projects, and network with like-minded developers.

- * **Microservices Architecture:** Developed as two microservices frontend with React.js and backend with Node.js and Express.js, ensuring scalable and maintainable codebases.
- * **Authentication and Security:** Implemented secure login with JWT tokens, stored in HTTP-only cookies, with middleware-based route protection and session expiration handling.
- * **Data Validation and Encryption:** Applied strict schema and API validations using validator libraries and encrypted user passwords with bcrypt for enhanced security.
- * **Routing and API Design:** Utilized Express Router for modular routing and clean API structure across the backend service.
- * **Deployment:** Deployed backend on AWS EC2, hosted frontend via NGINX, and used PM2 to ensure 24/7 uptime and process management.
